Lithium Thionyl Chloride Battery
Brief Data-sheet Model: ER13150

1. Basic Specification (Typical values relative to cells stored for one year or less at +30°C Max.)

Customized a variety of JST/MOLEX/ORTHER etc. connector, terminal. Please contact HJBP engineer.

*Energy type is bobbin structure and best suit for low current discharge.
*It may require depassivation before medium currents can be delivered.

2. Electrical Characteristics and Dimension

![Graph 1](image1.png)

![Graph 2](image2.png)
3. Key feature

★ High and stable operating voltage.
★ Stainless steel container
★ Hermetic glass-to-mental sealing
★ Non-flammable electrolyte
★ Low self discharge rate (less than 1% after 1 year of storage at +25°C)
★ UL1642, CE certification, UN38.3, MSDS/SGS/ROHS test reporter, ISO19001 quality control system

4. Main applications

★ Utility metering
★ Military electronics
★ Automatic meter reading
★ Alarms and security devices
★ Professional electronics
★ Automotive electronics
★ Tollgates systems

5. Warning

* Please Keep away Fire, explosion and severe burn hazard.
* Do not recharge, crush, disassemble, heat above 100°C.
* Do not solder directly to cell.

Note: Any representations in this brochure concerning performance are for informational purposes only and are not construed as warranties either expressed or implied, of future performance.
